"Alexa, turn on my *Home*"

INTRODUCING THE
SIMPLEST WAY TO CONTROL
YOUR ENTIRE HOUSE
YOUR VOICE

Control4

Imagine this...

We've all been there—walking through the door, arms full, into a dark house. Wouldn't it be nice to tell your house to offer a helping hand? Now you can. A simple voice command—such as "Alexa, turn on *Welcome*"—lights up the hallway and kitchen, fires up your favorite Pandora station, while the door locks itself behind you.

This is Control4 Home Automation with Amazon Alexa.
